

Driver Requirements

Thank you for considering participation in our effort to bridge the Digital Divide.

Our company, M2Catalyst, provides the telecom industry with data that identifies where network performance needs improvement. When you drive around with our mobile app installed on your phone, you will automatically be collecting and transmitting to us data that will be incorporated into our analysis. Other than turning on your phone, there is no effort required on your part. Once you submit to us the required proof you have driven for the required number of days, we will send you a \$50 gift card.

Drivers **MUST** complete these steps:

- 1. Download the Network Cell Info Lite app, accept the Terms of Service and Privacy Policy, and enable required permissions.**
- 2. Have the app on your phone for one week of your normal driving activity in Houston once you have enabled all required app permissions.**
- 3. Show us you've had the app loaded with permissions enabled for a month by sending a screenshot to drivers@m2catalyst.com of your history tab displaying that you've been collecting data for a week.**

Once we have verified completion of steps 1 through 3, we'll send you a \$50 gift card.

Participants are limited to a maximum of 1 gift card per month per participant.

Promotion Valid from 9/1/22 to 10/31/22

Our privacy policy and terms of condition are incorporated herein.
